Autoproperty

Properties on Autopilot

Investor presentation · November 2026

The problem, measured at Stay 2015–2026

Letting is still manual work

≈ 2 400 hours

a year go to letting work at Stay.

1,4 FTEs

14,5 hours

before a tenant typically gets a first reply on a repair.

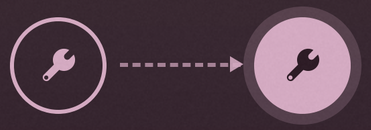

34 %

of home seekers' enquiries never got a written reply: too much volume.

2 call-outs

on average before a fault is fixed. We troubleshoot all the time.

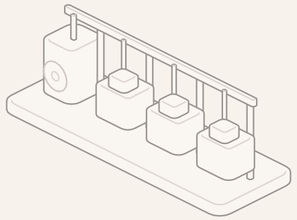

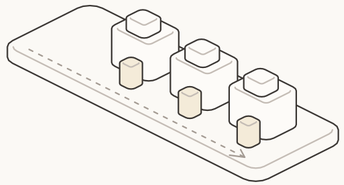

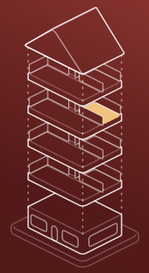

So landlords have to hire in step with the number of homes.

Measured at Stay 2015–2026 (28 863 cases, 52 715 messages; hours = number of cases × time spent). Call-outs per fault: Stay's experience.

Why the gain needs a new workflow

AI on top of old routines gives little

	New technology on top of the old workflow	The workflow rebuilt
Electricity, 1900–1930	 Around 1900 **One big electric motor replaces the steam engine** Same factory, same flow. Productivity barely moves.	 The 1920s **The factory is rebuilt around electricity** A motor on every machine and a new floor plan. Productivity takes off.
AI in letting, today	 Most landlords **ChatGPT on top of email, Excel and Hybel** People still do the work, just a little faster.	 Autoproperty **Letting rebuilt around agents** The agents do the work. People handle only the exceptions.

Landlords who don’t rebuild the workflow don’t get the gain.

Paul A. David, “The Dynamo and the Computer”, American Economic Review, 1990.

The solution, for professional and commercial landlords

AI agents that do the work, not tools that help you do it

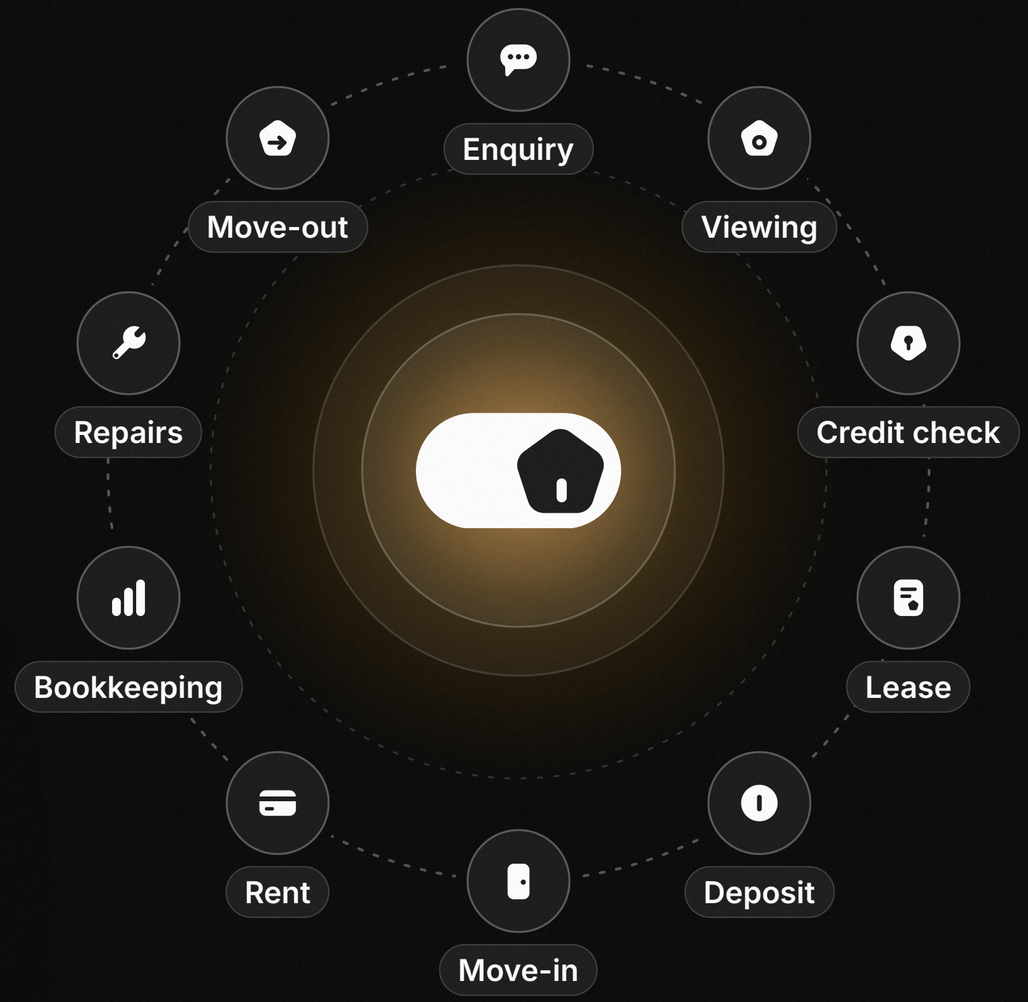

Leasing agent
Enquiry, viewing and credit check

Tenant agent
Lease, deposit, move-in, rent, bookkeeping and move-out

Maintenance agent
Repairs, until the job is done

The landlord decides what happens automatically. Only the exceptions go to a person, and everything is documented.

Built on Finn BankID Keyhole Kartverket

Where we are, and where we are going

Five levels of autopilot

Level 1

Tools

The landlord does the work. The system stores it.

Hybel, Husleie.no

Level 2

Assistant

AI suggests replies. A person sends them.

AI on top of old routines

Level 3

Agents

Answers, runs credit checks, sends the lease to BankID signing and the door code. From January 2027: repairs, invoicing, bookkeeping.

Autoproperty 2027

Level 4

Autonomous operation

A voice agent on the phone. Self-guided viewings with BankID and a smart lock.

Target 2028

Level 5

Full operations

The whole operation delivered through a licensed manager. The landlord needs no staff of its own, only a caretaker.

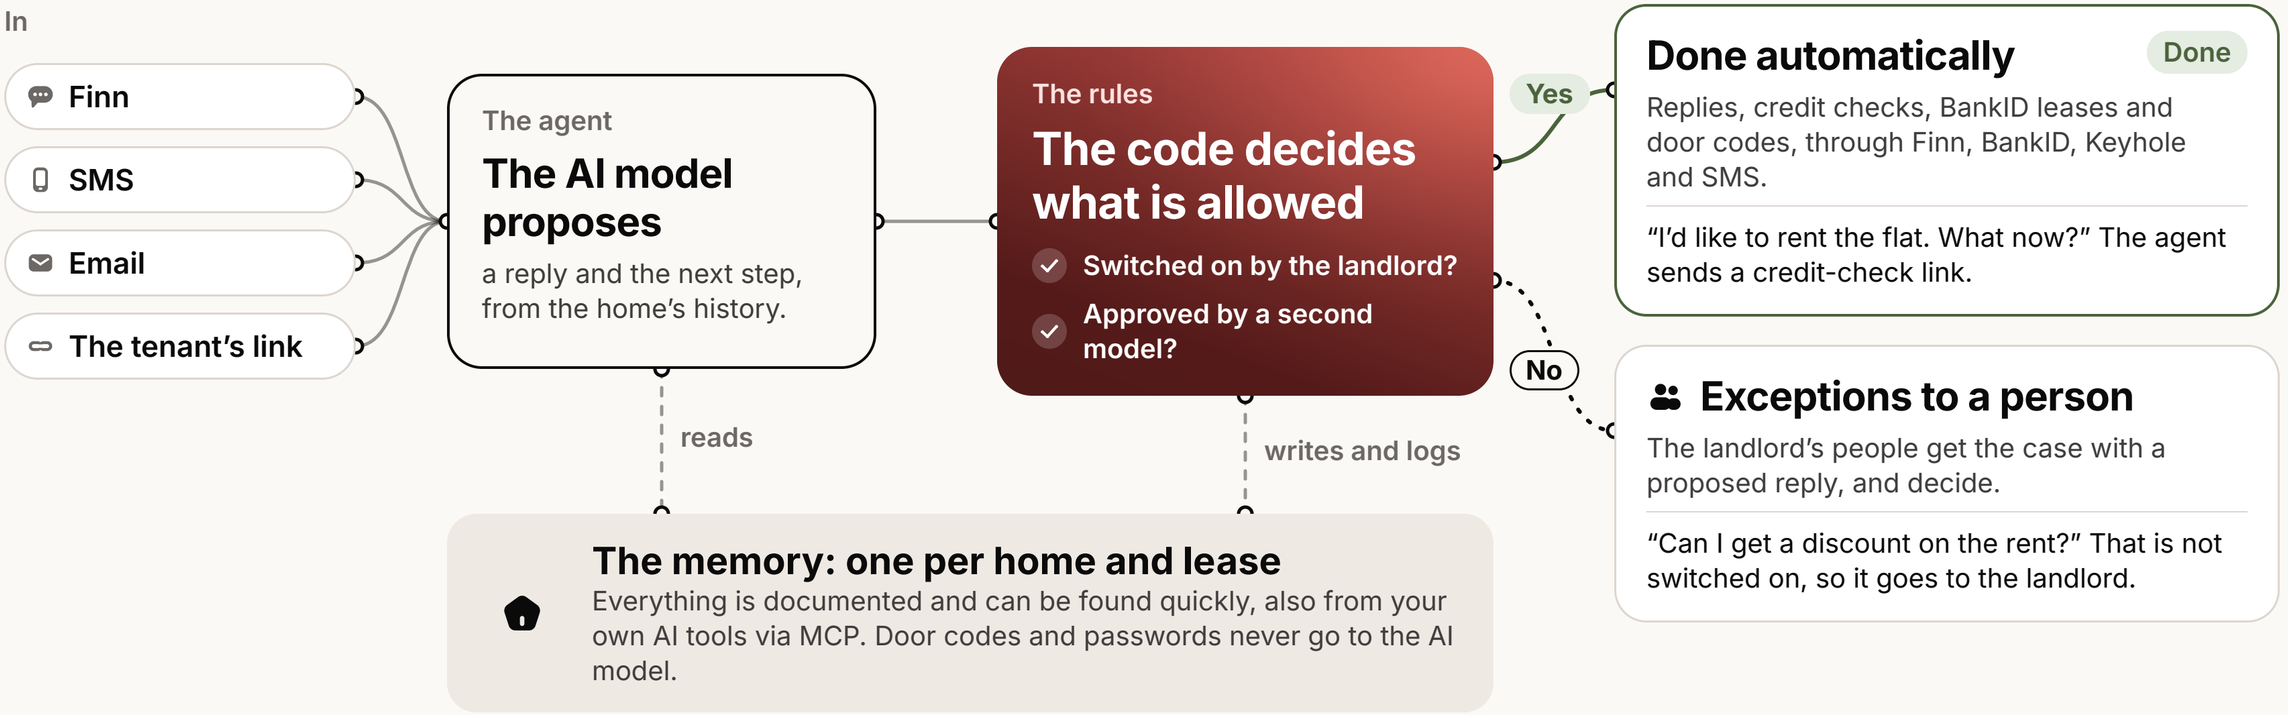

Next track

FTEs per 100 MNOK of rent, letting work only

≈ 3 measured at Stay	A few fewer	1 target	½ target	No staff at the landlord

Stay: 2 400 hours ÷ 1 700 = 1,4 FTEs of letting work for about 45 MNOK of rent (measured 2015–2026). In use at Stay: BankID leases and credit checks. Leasing agent and door codes in testing. Maintenance, invoicing and bookkeeping from January 2027. Levels 4 and 5 are targets.

The AI agents act only within rules written in code

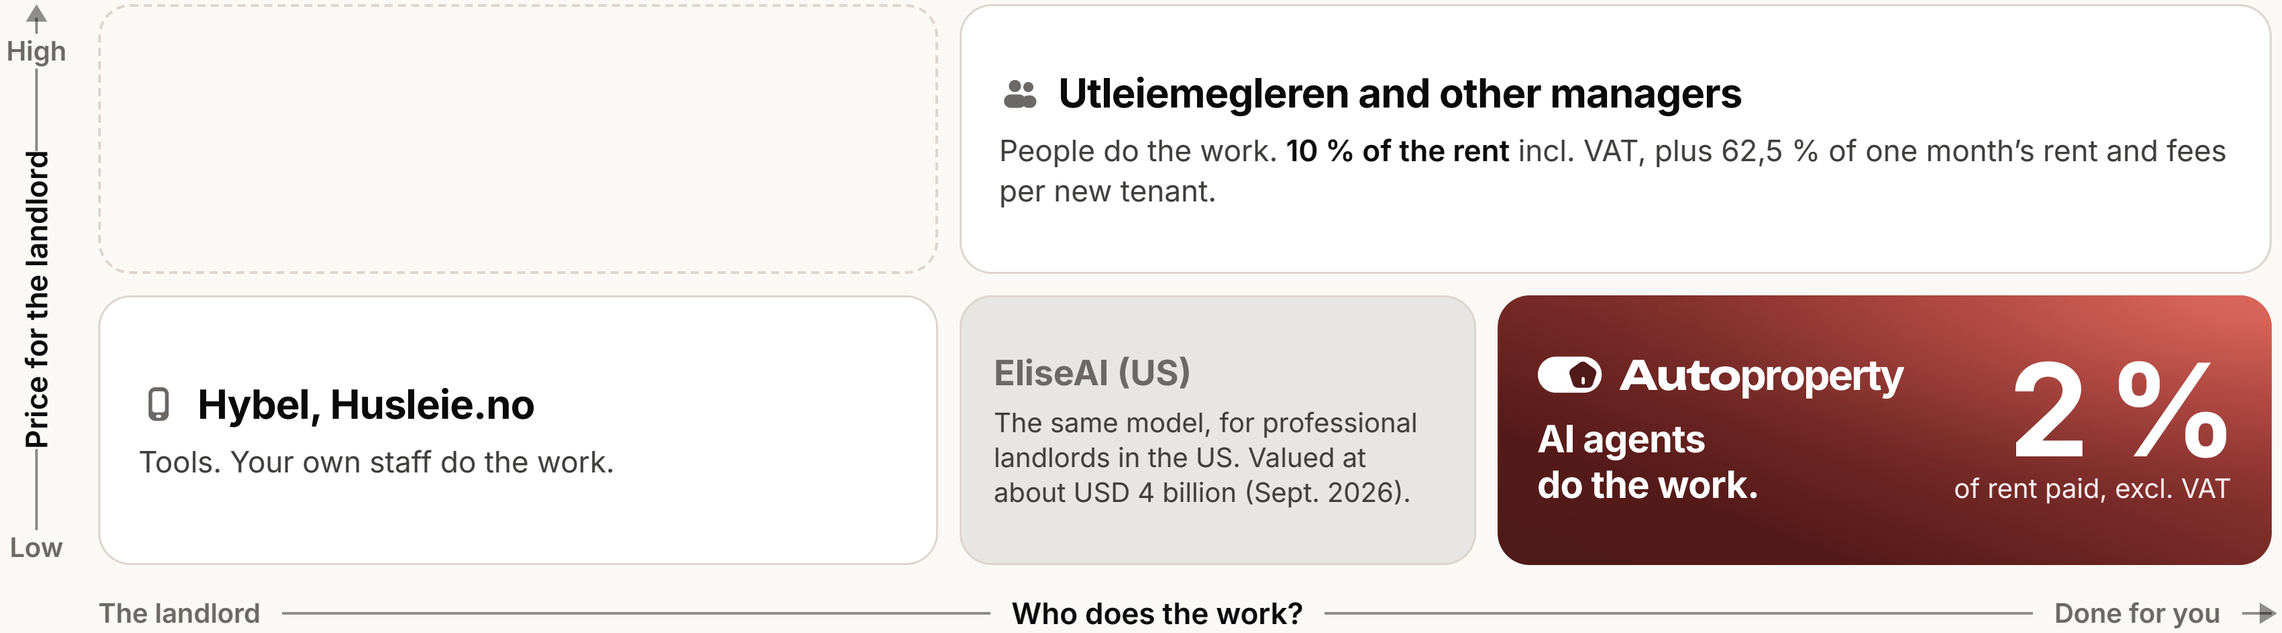

The Autoproperty codebase, main branch, 8 Nov 2026. In use at Stay: BankID leases and credit checks. Working and in testing: the leasing agent and door codes at move-in; in testing the landlord approves every reply. From January 2027: maintenance, invoicing and bookkeeping.

Where we stand in the market, November 2026

The work gets done, for a fraction of the agent’s price

The EliseAI model for professional and commercial landlords in the Nordics, built for Norwegian tenancy law, BankID and Finn.

Utleiemegleren.no, “Utleie og forvaltning, variabel pris”, read 8 Nov 2026; prices include VAT under Utleiemegleren’s terms. EliseAI: press release, 29 Sep 2026.

What it means for property value

With AI agents the owner gets about 8 % more net operating income from the same building

Example: a portfolio with 200 MNOK in annual rent.

External manager, 8 % excl. VAT — **16,0 MNOK**

Autoproperty 2 % + two people on exceptions (target) — **5,5 MNOK**

Autoproperty 4,0 · Two FTEs 1,5

+10,5 MNOK
in net operating income a year (+7,8 %)

≈ 230 MNOK
more property value at a 4,5 % yield

Have your own staff? Then you can grow without hiring.

Rent per employee

Today, letting only (Stay, measured) — **≈ 30 MNOK**

With Autoproperty (target) — **100–200 MNOK**

Rental income grows with the portfolio. The administration does not.

A worked example. Assumptions: other operating costs 25 % of the rent, 750 000 kr per FTE including social costs, a 4,5 % yield. External management: the example uses 8 % excl. VAT. Utleiemegleren charges 10 % of the rent incl. VAT, plus 62,5 % of one month's rent and fees per new tenant, not counted here (utleiemegleren.no, read 8 Nov 2026). Sensitivity: +7,3 to +8,5 % net operating income with other costs at 20–30 % of the rent. Stay: 2 400 hours ÷ 1 700 = 1,4 FTEs for about 45 MNOK of annual rent.

Why now, autumn 2026

Investors already pay for this model

EliseAI, US

≈ 4 bn USD

valuation after raising USD 350 million in September 2026, about 20 times annual recurring revenue. Used in 1 in 6 US apartments.

Lette, UK and Ireland

6,5 m USD

in seed funding in October 2026. Entering new European countries in 2027.

Reports over 30 000 homes after about eighteen months (Lette's own figures).

The Nordics

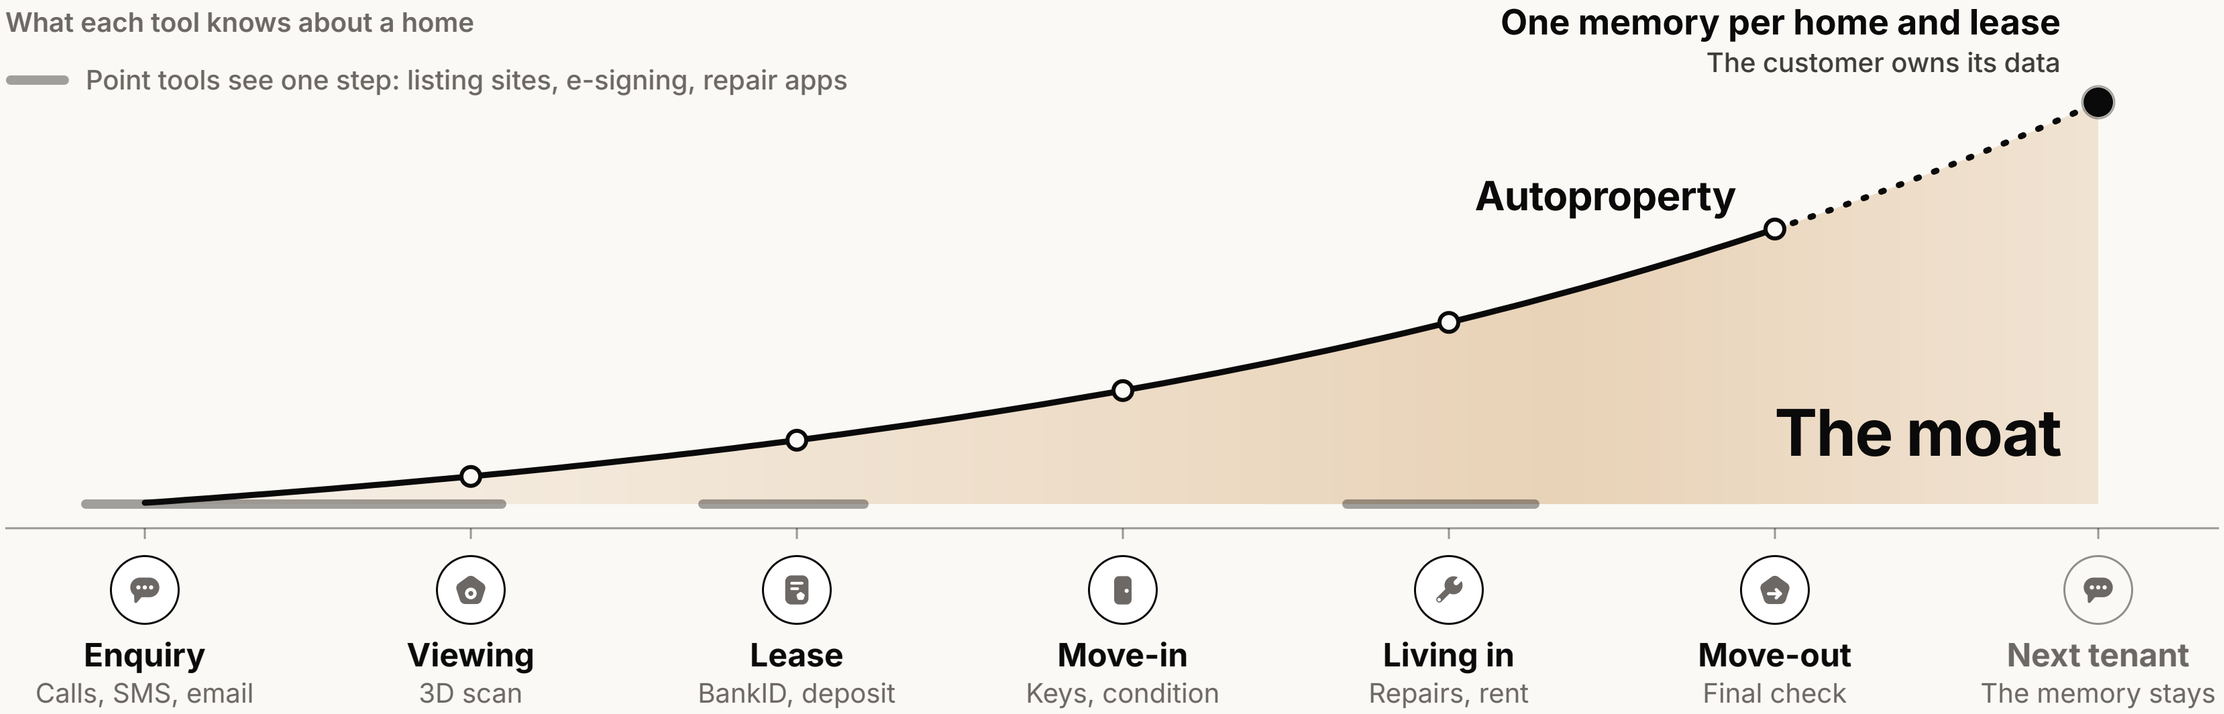

12–24 months

The competitors here are new: Vessla (Stockholm) and Cortas (Copenhagen) raised their first money in October 2026 and do not disclose home counts. We believe the window is 12–24 months.

Norway has BankID, Finn as the dominant listings site and public property registers (Kartverket). Sweden and Denmark have equivalent e-ID.

EliseAI: press release, 29 Sep 2026. Lette: lette.ai, 26 Oct 2026 (own figures). Vessla: Seedcamp, 19 Oct 2026. Cortas: cortas.dk, 27 Oct 2026. The window is our own assessment. Every competitor: appendix F.

One lasting memory per home and lease

Stay's operating history 2015–2026, used for development and testing. The customer owns its data.

About 120 MNOK a year in rent on the platform

once Stay and Bergensgruppen are live (from the second half of 2027)

Stay ≈ 45 MNOK

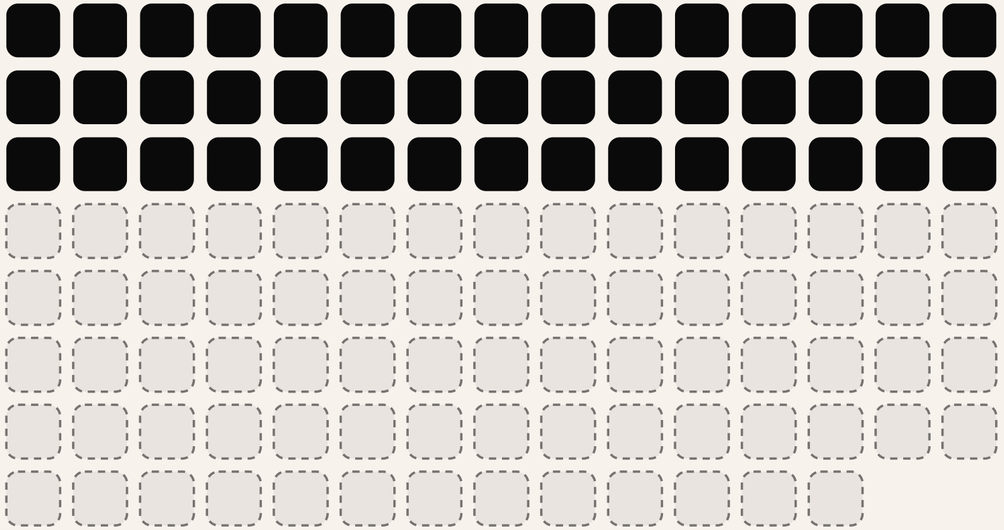

About 260 tenancies, whole flats and rooms. BankID and credit checks in use now, level 3 from January 2027.

Bergensgruppen ≈ 73 MNOK (estimate)

About 270 apartments. Pilot from April 2027, fully live in H2. Pilot agreement signed.

Total ≈ 120 MNOK

in annual rent

One square = 1 MNOK of annual rent

Stay: letting overview, 19 Oct 2026. Bergensgruppen: 270 × Stay's average rent for whole flats, an estimate. Both customers are tied to the owners.

Business model, from 2027

We get paid when the rent comes in

Price

2 % of rent paid

Excl. VAT. An empty home costs nothing.

Every 100 MNOK of annual rent gives Autoproperty **about 2 MNOK a year** (2 % of rent paid).

More income streams

When the agents run the whole tenancy, we can offer tenants services they must buy anyway, and take a commission.

Deposit guarantee In the budget	**Deposit account** Upside	**Contents insurance** Upside
Electricity Upside	**Internet** Upside	**And more** Upside

Next track, from 2028

Not in the budget or the valuation ladder

Commercial property

The same model, a share of rent paid. The price is set in the pilot with the first commercial customer.

Full operations

The whole operation delivered through a licensed manager.

Only the commission on the Keyhole guarantee is in the budget. The rest is upside, left out of the budget and the valuation ladder.

Plan for 2027

From live at Stay in January to the next round in August 2027

Jan 2027

Live at Stay

Every level-3 module live

Apr 2027

Bergensgruppen, pilot

About 270 apartments, ≈ 73 MNOK in annual rent. Fully live from the second half.

Spring 2027

Outside customers

The first outside paying customers

June 2027

Full season

A full letting season

Aug 2027

Next round

Every customer live, break-even (ambition)

Sep 2027

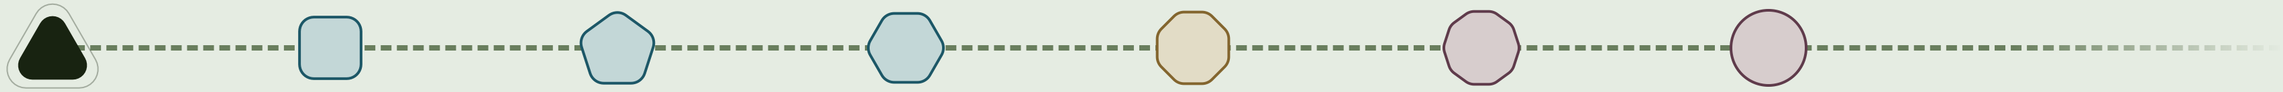

Commercial

The first design partner

Jan 2028

Commercial module

Live with the first customer

The company’s plan, November 2026. The base case breaks even in 2028.

The round funds the company to profit in 2028

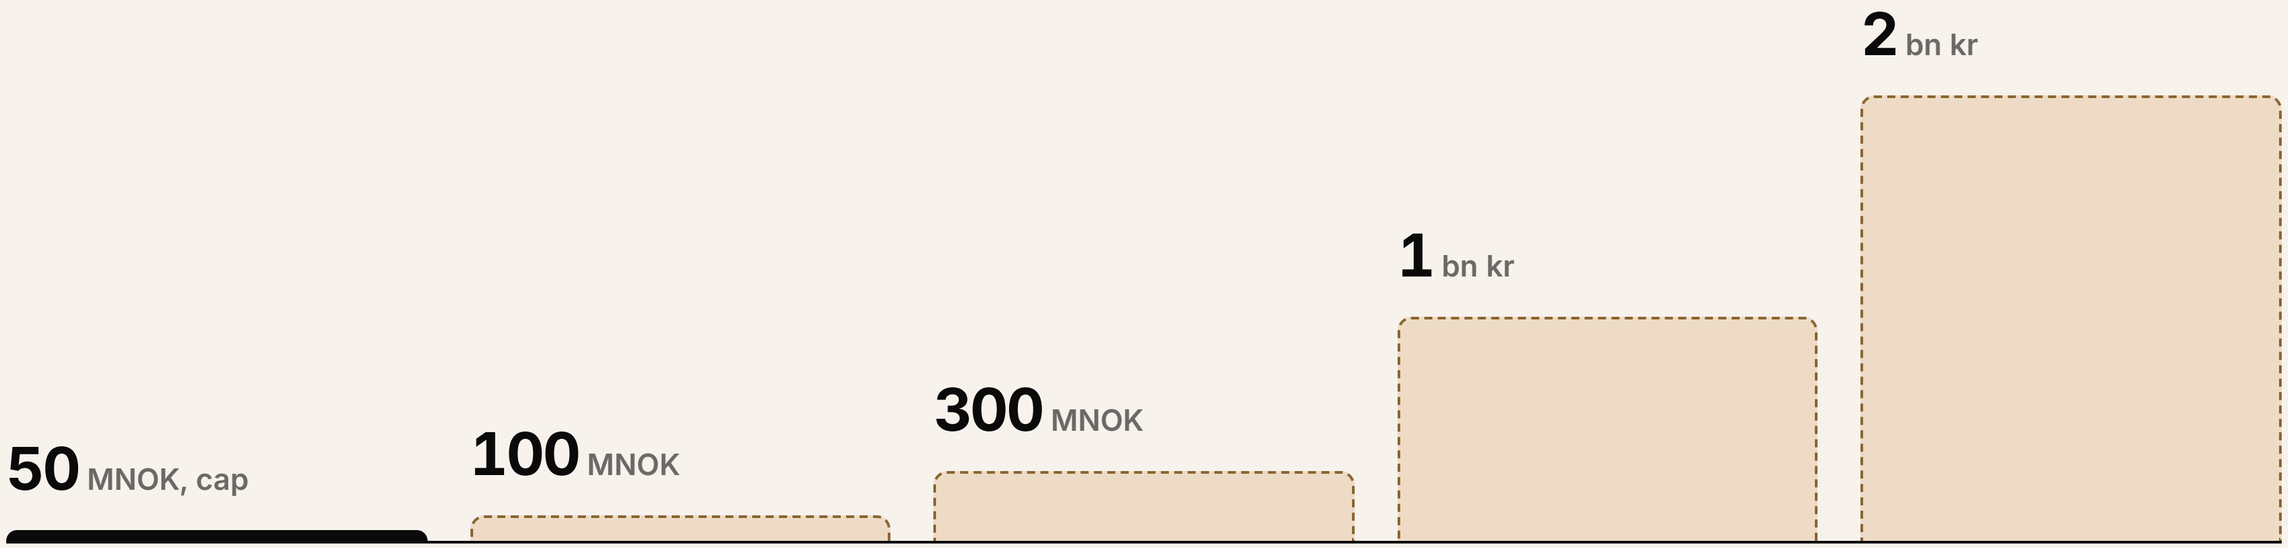

In the base case. Break-even at about 165 MNOK of annual rent at 2027 costs.

2027 → 2028	Base	Ambition	Low growth
Rent, year average, MNOK	82 → 420	155 → 840	82 → 270
Revenue, MNOK	1,6 → 8,2	3,0 → 16,4	1,6 → 5,3
Operating result, MNOK	−1,2 → +0,6	−0,2 → +6,3	−1,2 → −0,2

Operating budget 2027–2030, investor version, recalculated 6 Nov 2026. Price: 2 % of rent paid. Average rent 17 200 kr in 2027 and 14 000 kr from 2028. Revenue: 2 % of rent paid (95 %) + guarantee commission. 2027: 45 + 73 × ½ ≈ 82.

The path to 2 billion kroner, targets to 2032

From a 50 MNOK cap today to a 2 bn kr target in 2032

Now
BankID leases and credit checks in use at Stay

Aug 2027
About 165 MNOK in rent and break-even (ambition)

End of 2028
About 0,8 billion kr in rent (ambition), start in Sweden

2030
About 2,5 billion kr in rent in the Nordics, 40 % margin

2032
10 billion kr in rent, about 200 MNOK in revenue

Targets, not forecasts. Each step needs proof before the next round. The ladder counts only 2 % of the rent. The extra services are left out.

What the investor gets, 1 MNOK invested today

The target: about 21 times the money in six years

21×

or about 66 % return a year.

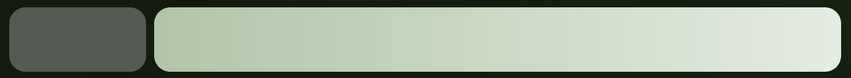

After dilution from three new rounds and 10 % options. The pre-emption right lets the investor keep their share by joining later rounds. Targets, not a promise.

The round, November 2026

Bergensgruppen joins on the same terms as the new investors

3,0 MNOK

as a convertible loan

- **0,5 MNOK** Bergensgruppen
- **2,5 MNOK** open to new investors

Discount **20 %**	Cap **50 MNOK** pre-money	Minimum **250 000 kr**
Paid in **Q1 2027** by the end of the quarter	Conversion **August 2027** at the next round, planned	Innovasjon Norge **1,0 MNOK** grant application

The money funds the whole 2027 plan People · AI tools · Software · BankID · Credit checks · Keyhole · 10 % buffer

The company’s terms for the round, November 2026.

The landlord is the party and uses the tool

The landlord
Party to the lease
uses Autoproperty

The lease

The tenant
Party to the lease

Autoproperty does not broker lettings.

The landlord decides what happens automatically. Only the exceptions go to a person.

The customer owns its data.

Full operations (the next track, from 2028) is delivered through a licensed manager.

The risks, and how we manage them

Few customers at first

Stay and Bergensgruppen first. The first outside paying customers in spring 2027, before the next round.

The AI gets it wrong

The landlord decides what happens automatically. Only the exceptions go to a person.

Tenancy law

Built for Norwegian tenancy law. The landlord is the party; Autoproperty does not broker lettings.

Privacy and data

The customer owns its data.

Funding

The round covers the whole 2027 plan with a 10 % buffer. We are applying to Innovation Norway for 1,0 MNOK.

Development capacity

Developers in Norway and India through a service agreement with Stay Homes. Autoproperty owns everything it builds.

Figures: the company’s terms for the round and the operating budget, November 2026.

About 1,3 million homes with rental companies

Sweden	Owned by companies. Allmännyttan (0,85 m) on top. SCB, 31 Dec 2025.	**0,85 million**
Denmark	Owned by companies. Almene boliger (0,56 m) on top. DST BOL101, 1 Jan 2026.	**0,40 million**
Norway	Commercial rental homes, Husbanken's estimate (13 % of about 600 000).	**≈ 78 000**

78 000 of the Norwegian homes are commercial. At 2 % of the rent that is about **220 MNOK a year**. About 117 000 municipal homes (Statistics Norway 2025) come on top and need public procurement.

Public housing needs procurement and is kept apart, as are private landlords and commercial property.

Husbanken 2025 (about 600 000 rental homes; 13 % commercial, 17 % municipal). Statistics Sweden BO0104T03, 31 Dec 2025. Statistics Denmark BOL101, 1 Jan 2026. Average rent: Statistics Norway 2025, 2 rooms.

About three times as much development capacity per krone

5 FTEs

in 2027 for 1,57 MNOK, about 314 000 kr each.

For the same money

Norwegian team
1 FTE

An experienced developer in Norway costs about 1 MNOK a year with holiday pay, employer’s tax and pension.

Our team
about 3 FTEs

The team has developers in Norway and India.

The team works at cost through a service agreement with Stay Homes. Under the agreement, Autoproperty owns everything it builds.

Operating budget 2027. Norwegian pay: WageIndicator 2026, 50 000–74 000 kr a month for developers with five years’ experience, plus social costs (estimate).

The Nordic AI competitors started in 2025 and 2026

Company	Founded	Funding	Homes	What they do	How we differ
EliseAI New York	2017	USD 350m, Sept 2026; valued at about USD 4bn	1 in 6 US apartments	Agents for leasing, maintenance and renewals; also healthcare	**Far ahead, but not in Europe**
Lette London, Dublin	March 2025	USD 6,5m, Oct 2026	over 30 000	Agents from enquiry to signed lease, voice included	**Ahead on scale and voice. Not in Norway, no BankID or Finn**
Vessla Stockholm	2026	USD 3,3m, Oct 2026	not given	Agents for contracts, maintenance and invoices at large owners	Admin work for owners; we run the tenant's journey on BankID and Finn
Cortas Copenhagen	2026	DKK 11m, Oct 2026	not given	Is itself an AI-based property manager	A service firm; we sell software
DigiHome Bergen	2025	none found	the team has managed over 150	A manager that also sells its system to agencies: Finn, credit checks, BankID	Closest to us in Norway. A tool for agencies; our agents do the work
Proptonomy Bergen	2026	USD 525k, Aug 2026	240, at its sister company	Agents for short stays: guests, cleaning and tradespeople	**Ahead on live use, but short stays, not tenancies**
Hybel Oslo, Visma	2000	owned by Visma since 2022	about 50 000 leases	The system landlords work in: listings, BankID leases, deposits	**Ahead on distribution. Tools for staff, not agents**
Qasa på FINN Vend	2014; Norway 2025	part of Vend (listed)	not given for Norway	Letting with a rent guarantee; the tenant pays 4,98 % of the rent	For private landlords; not agents

The companies' own figures and press releases, read 8 Nov 2026: eliseai.com, lette.ai, seedcamp.com (Vessla), cortas.dk, digihome.no, proptonomy.ai, hybel.no, qasa.com. Utleiemegleren is on slide 7.
